CECLAVÍN’S UNIQUE DETACHED “BUJÍO” CHALETS :

FOR STAR-GAZERS AND NATURE-LOVERS

Los Bujíos" are located in the “Dehesa boyal de Ceclavín”, 2 km from the town. The unique domed architecture is a representation of an astronomical observatory and, by design, the vaulted structure maintains a more constant interior temperature.

For the nature-lovers, they are surrounded by an array of flora and fauna native to the area, and a countryside populated by holm oaks interspersed with huge granite rock formations. For the star-gazers, they sit under one of the clearest, most pollution-free skies in Spain, and so each Bujío includes a large capacity telescope with which guests can admire the wonders of the cosmos.
